The Splendor of Great Architecture

In this 2015 edition of the *Almanac of Architecture & Design* we elevate to new levels the rich exploration of architecture -- its people, awards, and changing context. The most significant new buildings in our planet's history are being designed and constructed now. There is a delight in great architecture and we are cataloging all the changes. We have expanded and updated the book, which is now also used around the world as the handy media guide to architecture and design facts.

The *Almanac* is the companion to our bi-monthly journal *DesignIntelligence* where we explore in depth the trends that are transforming architecture, design, and design thinking. We are grateful for the increasing media attention and for all those extra copies that are now circulated to owner groups in both the public and private sectors. Circulation advances are being made each year and we see no time ahead when the digital *Almanac* will replace the print version. While the circulation is higher than ever before in digital form we still hear testimonials from university librarians, professional practices, and broadcast networks that use the print version – and use it often. The shelf life and relevance of the *Almanac* is expected to further advance in richness and user appreciation. Indeed, the print version and the digital version now work together, like best friends, complementing the diversity of uses that our readers seek.

Huge trends that in turn create other trends are having a tremendous impact on all industries. Global consultancy PwC has identified five mega-trends that it says will shape the future, and we see direct implications for the design professions:

1. **Global economic shifts.** This includes the balance of world trade, control of capital resources, and shifting economic health affecting the export of services by U.S. firms. Service exports by the top 30 firms who work outside the United States now total over $2.5 Billion dollars, which is expected to grow by 11 percent in 2015.

2. **Urbanization.** New demands of design firms with expanding attention to city planning and urban design. Public health is a fast growing field for designers. Firms are studying consumption habits and its environmental impacts.

3. **Technology.** *DesignIntelligence* has been chronicling the advances being made over the last twenty years. Communication and marketing, productivity, robots, big data, 4-D design, and new owner expectations. Mobile communications is altering who and how design services are being delivered to owners.

4. Resource scarcity/climate change. We are now on the brink of significant climate change bringing forward resilient design and an expanded definition of sustainability. Firms are responding with broad and deep sustainability services.

5. Demographic shifts. We are dealing with workforce diversity, talent acquisition and retention, leadership and ownership transitions, and new generational methods.

This *Almanac* examines in vivid detail the many dimensions of design data and brings forward the leading firms who are responsible for the stewardship of our planet. We list the top 333 by gross revenue and the top 1,000 by regional and global brand strength as determined by the editors of *DesignIntelligence*.

In this beautifully packaged edition we remind you to check out the *Almanac* website at www.di.net/almanac for continually updated statistics and facts on architecture and design. We see ahead revolutionary and disruptive innovation in the design professions. Much progress is being made. The design professions are more dynamic and entrepreneurial than at any previous time in history.

While the *Almanac* by definition is an annual update, we'll nevertheless be working daily on updating the digital product and preparing data for *DesignIntelligence* with six special issues to come in 2015 and with 24 editions of *DesignIntelligence Update* slated to be distributed as well. Stay in touch and be well!

Wishing you a prosperous 2015!

Jim Cramer, Hon. AIA, Hon. IIDA, CAE

NORTH AMERICA'S TOP 1,000 ARCHITECTURE AND DESIGN FIRMS |

This chapter features an alphabetical listing of leading North American architecture and design firms with data about the type of services they offer; their size, headquarters, and geography; the market segments they work in; and metrics from the *DI Index*.

America's Leading Architecture & Design Firms 2015

This section of the *Almanac* features an alphabetical listing of leading North American design and engineering firms selected by the editors. Each year, *DesignIntelligence* polls architects and designers in North America regarding their firms' officers, firm size, primary services offered, market segments and geographical locations served, and the nature of their practices. The firms are invited to participate in additional research underwritten by the Design Futures Council, which includes surveys about trends and market shifts, compensation and fees, technology, mergers and acquisitions, and management strategies.

The key to interpreting the tables is featured below. Firm size, headquarters (HQ), firm type, and markets are determined by *DesignIntelligence* surveys or from record files. Although the concept of headquarters might be less normative than in the past, this convention is still often used for diagnostic purposes in many market-data studies. If your firm has no headquarters and we have listed one, please make sure to complete a survey next year at di.net. The list of services includes market segments and specific professional specializations. The DI Index was determined by survey responses, with further research conducted by *DesignIntelligence* and Greenway Group analysts. The criteria include geographic service coverage and reputation (awards as listed in the *Almanac of Architecture & Design* and recognition in professional and business publications). Of the five tiers, only firms in the top three (as represented by 3–5 stars) are included due to space considerations. Abbreviations were used in some firm names due to space constraints: architecture = Arch.; architects = Archts.; associates = Assoc.; construction = Const.; engineers = Engrs.

Principals of firms who want to be included in our next *Almanac* can obtain and/or fill in a survey at di.net; email the editor, Jane Wolford, at jwolford@di.net for a copy; or call *DesignIntelligence* at (678) 879-0929. Firms appearing in this *Almanac* can expect to receive a copy of next year's survey in the mail soon or can request a survey by contacting DI or the editor.

DesignIntelligence 333 |

This chapter features a ranking of America's top 333 architecture firms, along with useful contact information and pertinent data.

DesignIntelligence 333

The *DesignIntelligence* 333 ranks the top 333 architecture and design firms in North America. To compile the most accurate and up-to-date information, firms throughout the United States and Canada were surveyed during the spring and summer of 2013. Under the direction of the editors, extensive research was conducted by the *Almanac* staff and the research staff of *DesignIntelligence* to compile a comprehensive geographically and demographically diverse group of firms that would qualify for inclusion. Professional associations, media lists, client organizations, and conference registrations of the Design Futures Council were also studied to determine the most active leading firms. The Greenway Group also researched additional media sources, such as leading professional and business publications read by clients in each of the areas of specialty.

The firms were mailed a letter inviting them to participate in the survey, along with a copy of the survey. The survey asked for information regarding their areas of specialty, employment counts, number of offices, fields of professional practice, 2013 gross professional fee revenues, leading officers of the firms, and other relevant information. The data collected was also used for the *Almanac*'s Directory of North America's Top 1,000 Architecture & Design Firms.

Telephone calls and emails followed mailed surveys if additional information was needed. Each firm included in this *Almanac* was contacted a minimum of three times by mail, email, or telephone. When firms did not respond, estimates were made based on previous surveys completed by the firms for *DesignIntelligence*, listings in business media, Greenway's private research databases, reliable information on the Internet regarding employee counts, and other credible sources. At least three independent sources were used to estimate gross revenues when the firms did not supply these figures. Blank fields in the ranking section or missing profile information were due to the firm not returning its survey. The number of reported firm locations and actual locations may differ. Totals may not equal 100 percent due to rounding.

To fill out a survey for next year's Almanac, visit www.di.net/almanac/, call DesignIntelligence at (678) 879-0929, or contact the editor at jwolford@di.net.

Listings of architecturally significant airports, aquariums, art museums, convention centers, and sports stadiums, with their requisite architectural statistics, are available in this chapter.

Airports: 1990–2014

Airports have evolved over the past century from small, utilitarian structures to sprawling multi-purpose complexes. Engineering challenges, the popularity of regional airlines, the need to accommodate larger jets, and expansion in Asia have resulted in the construction of countless new airport terminals since 1990. Many of those noteworthy for their architecture or engineering are listed in the following chart.

Aquariums

The opening of Boston's New England Aquarium in 1969 ushered in a new age for aquariums, combining the traditional ideas found in the classic aquariums of the early 20th century with new technology and revised educational and research commitments. Aquariums have since proliferated. The following pages highlight the major free-standing aquariums in the United States.

Aquarium	Location	Opened	Cost
Alaska SeaLife Center	Seward, AK	1998	$56 M
Aquarium of the Bay	San Francisco, CA	1996	$38 M

Star Award

The International Interior Design Association's Star Award celebrates **individuals and organizations that have made extraordinary contributions to the interior design profession**. As the Star Award is merit-based, it is not necessarily granted each year. Although non-members are eligible, the IIDA board of directors (the selection body) only accepts nominations from IIDA fellows, chapter presidents, and directors.

Top Green Projects

The American Institute of Architects' Committee on the Environment annually selects the Top Green Projects to highlight **viable architectural design solutions that protect and enhance the environment**. Winning projects address significant environmental challenges, such as energy and water conservation, use of recycled materials, and improved indoor air quality. Responsible use of building materials, daylighting, efficient heating and cooling, and sensitivity to local environmental issues are some of the jury's considerations.

Twenty-five Year Award

The American Institute of Architects' Twenty-five Year Award celebrates **buildings that excel under the test of time**. Eligible projects must have been completed within the past 25 to 35 years by a licensed US architect, though the buildings may be located worldwide. Winning designs are still operating under the tenets of the original program, demonstrating continued viability in function and form, and contributing meaningfully to American life and architecture.

AIGA, the professional association for design

One of the oldest and largest membership associations for professionals engaged in visual communication and graphic design, AIGA, the professional association for design was founded in 1914 as the American Institute of Graphic Arts. Its more than 25,000 members include professional designers, educators, and students in traditional communication design fields, such as type and book design, as well as such newer disciplines as interaction design, experience design, and motion graphics. In addition, AIGA supports the interests of those involved in design in other disciplines, professions, and businesses who are committed to advancing the understanding of the value of design. AIGA serves as a hub of information and activity within the design community through conferences, competitions, exhibitions, publications, educational activities, and its website.

About the Editors

James P. Cramer is founder and chairman of the Greenway Group, a management consulting firm specializing in strategy, leadership, and organizational health. He is the author of three best-selling books on professional practice leadership and the founding editor and publisher of the journal *DesignIntelligence*. Along with Jonas Salk, M.D., he founded the Design Futures Council in 1994 in La Jolla, CA, and in Washington, DC, at the Smithsonian Institute. Each year Cramer and his colleagues at Greenway Group conduct research on the future of the design professions. They currently have ongoing research in the fields of design education, executive compensation, business trends & shifts, and professional services value migration. His work has been featured in *Business Week*, the *Wall Street Journal, Architectural Record*, National Public Radio and elsewhere. Cramer is the former Executive Vice President and CEO of the American Institute of Architects and the former President of the American Architectural Foundation. He served as group publisher of *Architecture* magazine for eight years. He is an honorary member of the AIA, an honorary member of the International Interior Design Association (IIDA), and a Leadership Fellow of the Western Behavioral Sciences Institute (WBSI) in La Jolla. He is a Senior Fellow of the Design Futures Council, a Richard Upjohn Fellow of the American Institute of Architects, and past board director of the Society of Architectural Historians.

Jane Paradise Wolford, Ph.D., is an architectural historian and the editor of the *Almanac of Architecture & Design*. She is also a senior consultant with Greenway Communications and an editor for the Ostberg Library of Design Management. Wolford has a doctorate in architectural history, theory, and criticism from the Georgia Institute of Technology as well as a Master of Science degree in architectural history from there. Her doctoral thesis established the theoretical and practical framework for architectural contextualism in its definitions and aspects of construction that enable buildings to relate better to each other and encourage a more sustainable, cohesively built environment. She is a LEED accredited professional. She also studied at Westmont College in Santa Barbara, CA, where she earned her bachelor's degree in English, and the University of California Berkeley, where she received her teaching credential. She and her husband, Arol Wolford, founded Construction Market Data in 1981, a leading international construction information service. She served on the board of the American Architectural Foundation and the Octagon Museum for more than a decade. In our constantly changing environment she is passionate about the potential of architecture to transform our world—into a better place that nurtures our physical and spiritual health and supports our endeavors.

östberg

Library of Design Management

Every relationship of value requires constant care and commitment. At Östberg, we are relentless in our desire to create and bring forward only the best ideas in design, architecture, interiors, and design management. Using diverse mediums of communications, including books and the Internet, we are constantly searching for thoughtful ideas that are erudite, witty, and of lasting importance to the quality of life. Inspired by the architecture of Ragnar Östberg and the best of Scandinavian design and civility, the Östberg Library of Design Management seeks to restore the passion for creativity that makes better products, spaces, and communities. The essence of Östberg can be summed up in our quality charter to you: "Communicating concepts of leadership and design excellence."
